Cocktail Stations

Features

Glastender home cocktail stations are manufactured to the same level of detail as the commercial equipment we have been manufacturing for over 40 years. Attractive, intuitive design makes our cocktail stations a pleasure to use and easy to maintain.

The easy-to-clean sink is stainless steel and seamlessly welded into the work surface. Drain fitting is included.

Condiment cups are conveniently located at the rear of the cocktail ice bin. A hinged stainless steel sanitary cover is included.

Welded drainboard glass storage area consisting of a stamped pan and perforated insert provides air circulation for drying glassware.

The bottle rail and cap catcher have a chamfered top rail for added strength and an attractive appearance.

The lighted bottle rail, available in 6" increments from 24" to 48" long, adds a special highlight to your cocktail area.

Foamed-in-place insulation and an ABS plastic breaker strip around the ice bin liners prevent thermal transfer from outside the ice bin so your ice lasts longer.
